

BOOK 3

Dear Students...!

(Very easy, easy, hard, and very hard sums for ages from 8 to 80.)

TKS EASY MATH E-BOOK

ISBN 978-93-340-2192-9

BOOK 2

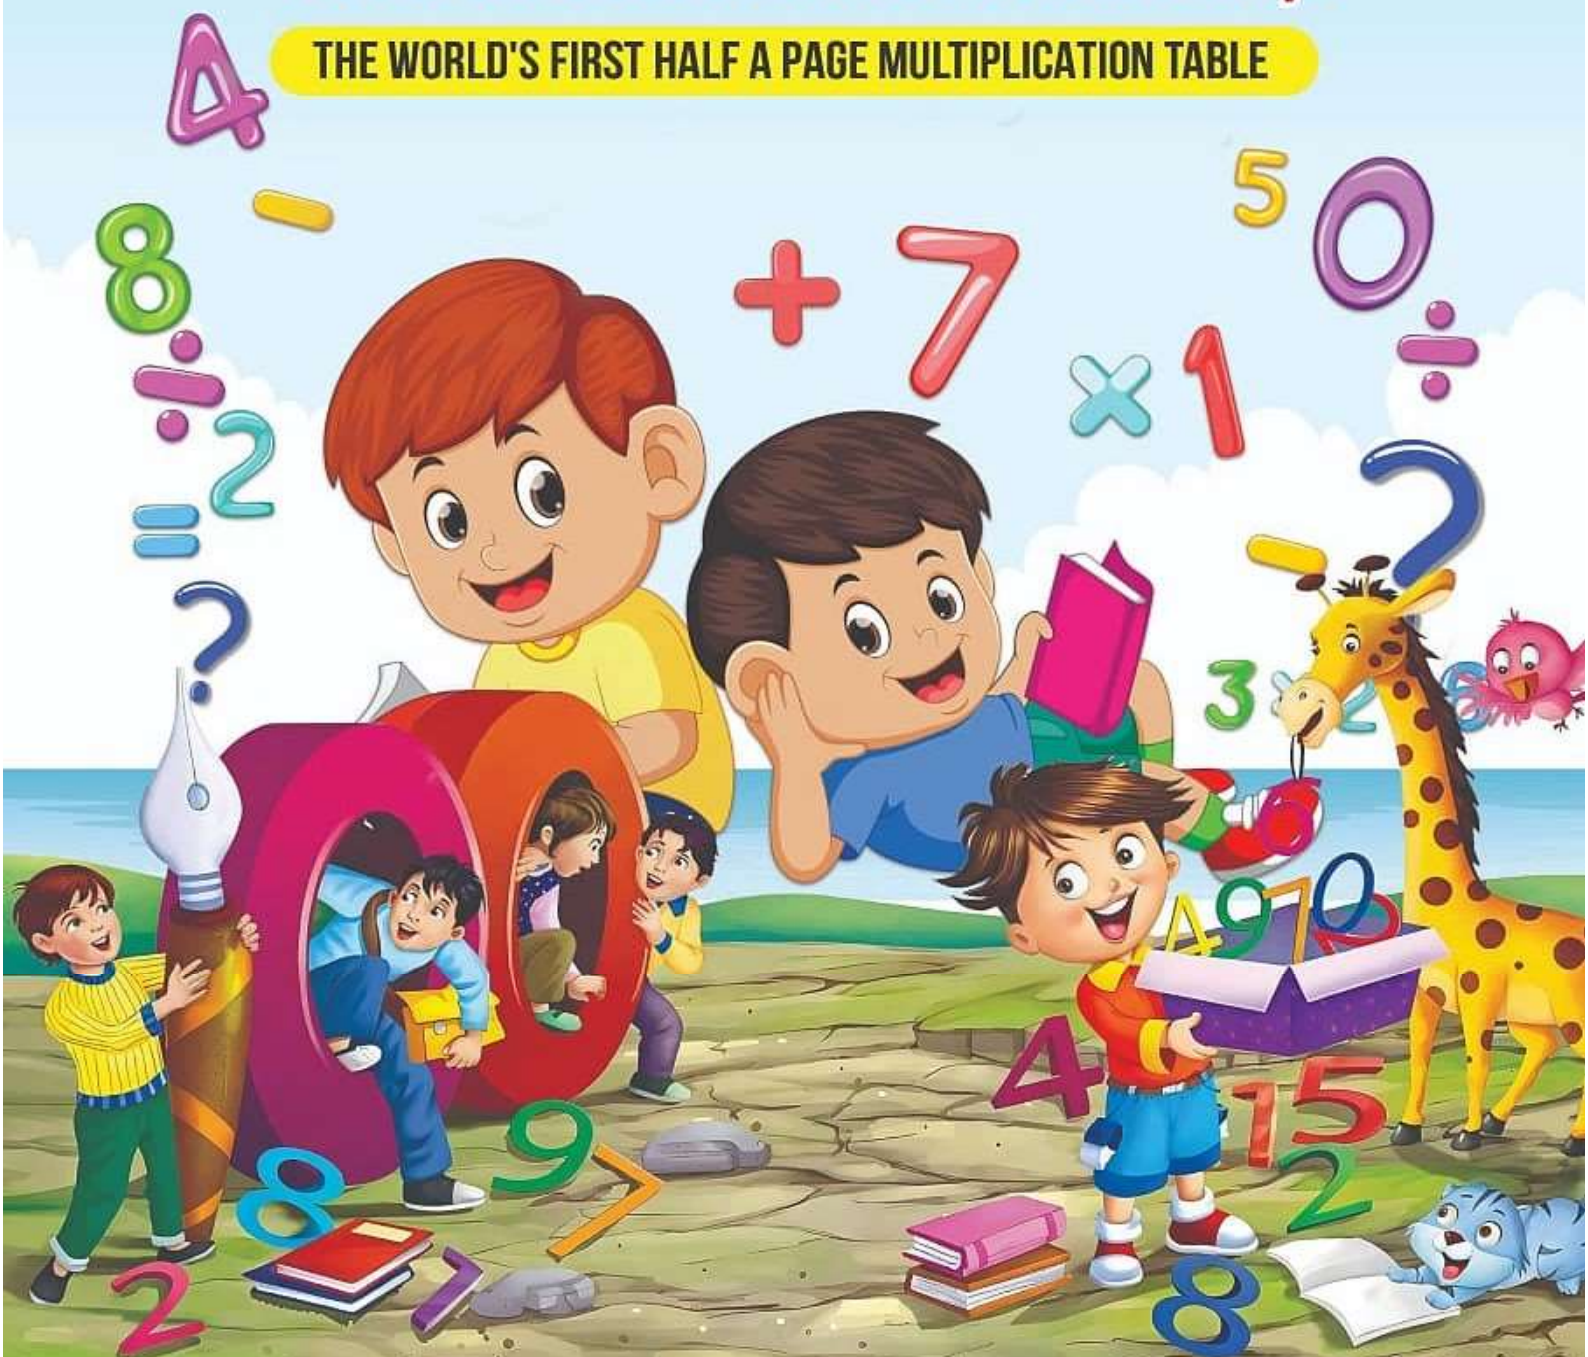

ENJOY TKS MAGIC NUMBER

Dear Students...!

Super fast, Fast track, Express and Slow-down
Sums in (+, -, x & ÷) Mathematics.

Accurate success in 10 minutes only.

THE WORLD'S FIRST HALF A PAGE MULTIPLICATION TABLE

KUPPUSWAMY.T, Retired School Master.

Amazing, Yet True

Greetings to All Dear Students

+, - , x and Division sums in 10 Minutes – Solve them and score 100/100 marks. Best Wishes.

Here are New, Easy and Wonderful Books.

I, T. Kuppusamy, served as a Teacher for 38 years from 1973 and have retired. As the outcome of my research over the past 15 years, I have released the **TKS EASY MATH E-Book**. I have obtained **Copy Right** and **ISBN** for them. Those in India can obtain the **E-Book** through www.tksmaths.com. Those abroad, obtain it through **Amazon**. Publishing it as a printed book is prohibited. **E-Books** only.

The Eighth Wonder of the World is in Your Hands.

E-Book - Special Features:

1. Time Limit

Subtraction	- 1 Minute
Addition	- 2 Minutes
Multiplication	- 3 Minutes
Division	- 4 Minutes

Practice sums can be solved without errors within the specified time, and the answers can also be verified. I assure you of that.

Book Nos. 2 and 3 – Pages 1 to 15

TKS Magic Numbers: For the first time in the world, Magic Numbers have been used. With these, the answers of the practice sums can be verified. Moreover, even if one tries to make a mistake, it is not possible to make a mistake; that is its special feature. They are given for all numbers from 10 up to 99,999. Practice sums for Addition and Subtraction are given along with the **Magic** numbers. All **Magic** numbers are given in Purple (**Violet**) colour.

Note: While doing the practice sums, the students themselves may write the **Magic** numbers lightly and erase them latter.

General Notes:

The easy method for students to form **Magic** numbers: Adding the number 9 (Nine) to any number gives the same number. Therefore, it is sufficient to add the digits leaving out the number Nine.

Example:

Magic Number of 192 = 1 + (9) + 2 = 12; Magic Number of 12: 3

Magic Number of 249 = (9) + 2 + 4 = 6

Magic Number of 289 = (9) + 2 + 8 = 10; Magic Number of 10: 1

Magic Number of 3920 = (9) + 3 + 2 + 0 = 5

Magic Number of 5499 = (99) + 5 + 4 = 9

Students themselves will form the **Magic** numbers very easily.
(Teachers and Parents may help.)

1. **Magic Number of 281 = 2**
2. **Magic Number of 4413 = (4 + 4 + 1) = 9 Magic Number: 3**
3. **Magic Number of 8734 = 8 + 7 + 3 = 18 = 9 Magic Number: 4**
4. **Magic Number of 9995 = 5 = (9 + 9 + 9) = 5**

Book No: 2 Page No: 38

Half-Page Multiplication Table:- The world's first half-page table. This half-page table alone is sufficient to do Multiplication and Division sums with the **Magic** number.

Note: There is no need to memorise the tables from 2 to 16. After the students first practise the **Multiplication and Division** sums in the **E-Book**, they can form sums by themselves and practise. To practise sums, more than 2,00,000 sums are given in 20 pages in Book No-2. After good practice, the students will complete Multiplication sums in 3 minutes and Division sums in 4 minutes. Division sums are difficult for them. However, in my **E-Book**, I have explained step by step very easily, so that students understand. Even students who say that they do not like Mathematics will do the sums with great interest. They will always score 100/100 marks. Best wishes to buy the **E-Books**, use it and succeed.

Eighth Wonder of the World:- Book No-2 Page Nos. 66&67 More than one lakh Multiplication sums on a single page. On the next page, there are more than one lakh Division sums.

Students can select the sums suitable to their ability and do them by themselves. Teachers and Parents may help. They will do the sums in their free time and verify the answers too. They will be very happy. Therefore, I request you to buy and give them the **E-Books**.

Work Book:- Book No-2 Page Nos: 48-67

In 20 pages, more than 2 lakh +, - , x and Division sums are given. Therefore, there is no need to pay a high price separately and buy a Mathematics book. This alone is sufficient. We proudly provide this to the students. This is the World's First work Book.

Addition and Subtraction Sums : Book No: 3

Addition sums can be done in 2 minutes and Subtraction in 1 minute and verified in one or two seconds.

Addition and Subtraction sums have been divided into four types.

They are SuperFast, Express, FastTrack and Slow Down. Further, the above categories have been divided into four types, namely (Very easy, Easy, Hard and Very hard).

Each Addition or Subtraction sum is divided into 16 parts. This is a wonderful treasure obtained by the students. It has been designed to suit everyone from slow-learning students to students with high I.Q.

If this e-Books reaches the hands of the students, they will become fortunate.

Best Wishes !!

1. Super Fast - Addition

Book No -3 Page No - 58 Sum No-1

Very Easy M.N.Magic Number

$$*201 - 3$$

$$*130 - 4$$

$$*914 - 5$$

$$1245 - 3$$

As per the Super Fast title, the digits of the answer of the sum and the digits of the **Magic** numbers are the same digits. They are 3, 4, 5. Therefore, whether the answer of the sum is right or wrong can be known within a couple of seconds or in the blink of an eye. Such practice sums are plenty in the **E-Book**. Therefore, I request you to buy this book immediately and give it.

2. Express- Addition

Book No: 3 Page No 61 Sum No- 2

Easy M.N. Magic Number

$$*637 - 7$$

$$*564 - 6$$

$$*851 - 5$$

$$2052 - 9$$

The numbers of the above practice sums have all been designed in such a way as to be added easily on the basis of (9) Nine. Therefore, when the number Nine is added, the answer becomes Nine. Therefore, whether the answer of the sum is right or wrong can be known within a couple of seconds.

3. Fast Track -Addition

Book No: 3 Page No 64 Sum No- 1

Very Easy M.N.Magic Number

$$182 - 2$$

$$45\bar{3} - 3$$

$$\underline{364} - 4$$

$$\underline{999} - 9$$

The first digits (**1st Digit**) of this practice sum have all been formed as **Magic** numbers. These will serve as practice to add easily and also to form sums.

(Further, it will be of great help in doing Multiplication sums.) They themselves will form practice sums by looking at the sums in the Practice Book. My best wishes to them.

4. Slow Down -Addition

Book No - 3 Page No - 67 Sum No- 1

Very Easy M.N.Magic Number

$$*521 - 8$$

$$*345 - 3$$

$$\underline{*253} - 1$$

$$\underline{1119} - 3$$

Slow Down sums are all difficult sums, as per the name. After practising in the other three categories, these sums can be done easily. By now, you would have known the importance of the **Magic** numbers. Therefore, there is no chance of an error occurring.

5. Super Fast –Subtraction

Book No - 3 Page No -70 Sum No - 2

Easy **M.N.Magic Number**

$$467 - 8$$

$$\underline{246 - 3}$$

$$\underline{221 - 5}$$

Magic number of 467 - 8. **Magic** number of 246 - 3. $8 - 3 = 5$
(Answer 221) **Magic** number of 221 - 5. Whether the answer of the practice sum is right or wrong can be known very quickly. Similarly, for 4- and 5-digit numbers, whether the answer is right or wrong can be known within a couple of seconds. Do practise. Be happy. Sums can be done in just one minute.

6. Express - Subtraction

Book No - 3 Page No -73 Sum No - 1

Very Easy **M.N. Magic Number**

$$642 - 3$$

$$\underline{531 - 9}$$

$$\underline{111 - 3}$$

Express means 9. When 531 is subtracted from 642, the result is 111 and its **Magic** number is 3. When 9 is subtracted from any number, the same number results **(3)**. I have explained this in detail in my **E-Book**. This is the first time in the world. I request you to try it and be happy. My **E-Book** will help you with that.

7. Fast Track - Subtraction

Book No - 3 Page No - 76 Sum No - 1

Very Easy M.N. Magic Number

$$953 - 8$$

$$\underline{431 - 8}$$

$$\underline{522 - 9}$$

Fast Track means that when a number is subtracted using the same number, the number 9 (Nine) always results. Therefore, you need not have any kind of doubt in this. Best wishes to form practice sums with 4-, 5- and 6-digit numbers, do the sums and succeed.

8. Slow Down - Subtraction

Book No - 3 Page No - 81 Sum No - 2

Easy M.N. Magic Number

$$64932 - 6$$

$$\underline{23876 - 8}$$

$$\underline{41056 - 7}$$

After forming sums with the **Superfast, Express, Fast Track** numbers and practising them, I request you to do the **Slow Down** sums in Book No-3 (18 pages in the Work Book). As I have mentioned above, the students will complete Subtraction sums in just one minute. After good practice, I request you to do Multiplication and Division sums.

Thank You, Greetings and Best Wishes.
